

2014 WASTE PROPOSAL

CD WASTE MANAGEMENT

The purpose of this proposal is to show how our total waste management service can transform Orpington High Street and save local businesses money.

Charlie Hamilton
Charlieh@cdwaste.co.uk

CD Waste site audit and customer feedback:

To provide a Total Waste Management service we recommend the following steps to be taken to optimise efficiency, reduce waste costs and visually improve the aesthetics of the bid area.

- Increase recycling - By segregation of cardboards – central baler
- New uniformed General Waste and Mixed Recycling bins clearly labelled
- Scheduled 3 day week collection
- Large items bulk collection point – central 40 yard skip
- Cleaning operative
- Introduce clear bag policy
- Eradicate over flowing bins

SITE OBSERVATION AND CUSTOMER FEED BACK

- Bins with dirty exteriors
- Bins not clearly labelled
- Unsure of general waste and mixed recycling bin ratio
- Lack of segregation i.e. food or cardboard
- Loose cardboard not collected
- Food waste apparent in mixed recycle Waste bags
- High cardboard content evident
- Clear bag policy for mixed recycling not enforced
- Missed collections unreliable service
- High waste costs
- Fly tipping
- Over flowing bins

Orpington High Street various bin locations

ORPINGTON 1st OFFICIAL WASTE CONTRACTOR AND SERVICE PROVIDER.

CD Waste Management Ltd

Take advantage of the cost savings for your business through our joint procurement of waste management services, initial saving based on collated information of a 100 businesses in Orpington is 30%.

Collective purchasing of Waste Management.

Orpington 1st will roll out its own recycling and waste management service. We estimate that through collective purchasing cost savings could be in the region of 50% if most businesses participate.

CD Waste Management Ltd in partnership with **Orpington 1st** will save your business money, other benefits are listed below:

- Massive cost saving
- Hassle free
- One contact point
- Daily collections
- Reduced traffic
- Fewer bins
- Reduced pest infestation
- Reduced Noise
- Reduced carbon emissions
- Increased recycling
- Zero to Landfill
- Cleaner Streets
- Reduced odour
- Enhanced visitor experience

At present there could be around 17 different 18 tonne vehicles in Orpington collecting waste at different times during the morning and throughout the day.

Environmental benefits to single waste collection are reduced CO₂ emissions, which is a result of reduced waste vehicle traffic. Reduced waste vehicle traffic also means a more pleasant and safe environment for people living in the area where the system is in use.

There will be no unsightly piles of waste or unpleasant odours, beneficial for both the cleanliness and image of the area. Uniformed, clean wheelie bins collected

a single waste collection system is very flexible and reduces congested streets even at peak times.

PRICING STRUCTURE

The pricing below is based upon different levels of uptake by the **Orpington 1st** members. The shaded area will be the initial starting price.

General Waste

Wheelie bins – varied capacity and waste bags

Cleaning up Orpington

Before

Untidy and less attractive, bins on their own do not encourage recycling. They do not appeal to urban developers, planners or high density housing.

After

Creates a focal point for recycling and waste collection which is aesthetically pleasing and increases the rates of recycling in urban areas.

With a rising focus on the aesthetic appearance of Orpington and the drive to remove unsightly containers from the streets, cd waste will introduce new uniformed bins with clear signage.

We can create a focal point for general waste & recycling whilst avoiding the public's negative connotations of waste.

ANNUAL MANAGEMENT FEE

£1200.00

16, 20, 40 SKIPS YARD ROLL ON ROLL OFF

For large items, bulk waste and items unsuitable or too big to place in the 1100L wheelie.

Transport: £130.00

Disposal: £96.00 per tonne

Collection adhoc

CARDBOARD BALER

Installation and rental of a small cardboard baler in a centralized location collected and baled by an Orpington 1ST operative.

Collected free of charge.
